

Introducing EPCglobal

Global Engineering Staffing Specialists

EPCglobal has over 20 years experience in staffing major E&C projects. Since 1986 our staff and contractors have worked on projects in over 40 countries. Our offices specialise in the supply of staff and contract engineers to major clients in the US and around the globe.

Expanding Your Options

The international E&C market has been hit by the same skills shortages affecting the whole engineering and construction industry. Our new approach to Candidate Attraction involves a dedicated team of 10 focused entirely on generating new candidate activity through focused advertising campaigns, international exercises and targeted referral projects. We are uniquely placed to increase our clients' options and deliver new talent. We currently have over 150,000 engineering professionals registered with us so we can put you in touch with the

Our Teams

Our teams are spread across 8 global offices in the US, UK and India. Our Recruitment Consultants will work with you to deliver against your exact requirements, utilising their industry expertise and key recruitment skills. In addition to standard recruitment services, we offer full management services and headhunting for senior positions, drawing on our extensive network of senior industry figures.

Our Core Focus

Civil Engineering	Process Engineering	P & ID Design
Electrical Engineering	Pipeline Engineering	Project Controls
Mechanical Engineering	Civil/Structural Design	PDS Piping Design

About Us

Our Clients, Industry & Services

Our Clients

EPCglobal's clients are at the very top of their respective fields. In various sectors throughout the industry we are working alongside established giants and fast growing new organizations as they continue to strengthen their workforces for new projects. We don't work with everyone. In a market where skills are in short supply, we choose to focus our efforts on a relatively small number of customers globally.

Our Industry

EPCglobal was established for engineers, by engineers. We have a detailed knowledge of every sector we work in and our people have all developed a full understanding of their specialization. We only work in the EPC sector. All of our attentions are directed at building and refining the world's largest available source of experienced engineering and construction professionals. Our business is divided by discipline, so each of our teams work exclusively on one sector of the industry. In each area of the industry, we've worked on some of the world's most high profile projects. We're proud of our clients' achievements and of the part we've played in contributing to their success.

Our Service

EPCglobal's offices are based around the world's largest engineering centers. Since its inception 20 years ago, the company has built on its ongoing success to grow steadily in the global market place. We now have 10 offices, servicing varying elements of the engineering community. Since 1986, our staff and contractors have worked on projects in over 40 countries across 5 continents. From San Francisco to Washington, from London to New Delhi, our community consists of over 100 recruitment staff, 200,000 engineers, and some of the world's foremost engineering and construction companies. In the changing global marketplace, we are positioned to deliver the best possible service to our clients. We are able to quickly mobilize resources anywhere in the world.

What our customers say...

"One of Bechtel's competitive advantages is the use of EPCglobal's recruitment services. Access to EPCglobal's network of specialist engineering staff is an attractive proposition for anyone who, like me, has responsibilities for hiring professional and quality minded personnel for major projects, to deliver against tight deadlines. I always seek their involvement, especially for skilled and senior people."

Rob Van Duyl
Commercial Manager
Bechtel

"The reason I only work with EPCglobal is more than just access to the best opportunities, a flawless payroll and all the basics, it's about support from people I know and trust. The best thing about these guys is that they act in the interests of their people. They know their business benefits in the end by helping us make the right decisions."

Carl Swann
EPCglobal Contractor
