

EPCglobal Rail

Engineering Staffing Specialists

EPCglobal has over 20 years experience in staffing major Rail projects. Since 1986 our staff and contractors have worked on projects in over 40 countries.

Expanding Your Options

The international Rail market has been hit by the same skills shortages affecting the whole engineering and construction industry. EPCglobal have been heavily involved in promoting the issue, in conjunction with the Daily Telegraph, The Independent, NCE, the Institute of Civil Engineers and the Institute of Electrical Engineers among others. Our new approach to Candidate Attraction involves a dedicated team of 10 focused entirely on generating new candidate activity through focused advertising campaigns, international exercises and targeted referral projects. We are uniquely placed to increase our clients' options and deliver new talent.

Our Community

There are currently over 120,000 engineering professionals registered with us. Our technology, developed in conjunction with the world's largest E&C companies with a £10m investment, provides fast and simple access to this community. We offer our clients the ability to contact these communities directly.

Our Teams

The Rail team is represented in 6 global offices in the US, UK and India. In addition we have a regular advertising presence in Central Europe and the Middle East. Our Client Services managers work with you to deliver against your exact requirements, utilising their industry expertise and key recruitment skills. In addition to standard recruitment services, we offer Search and Selection services for senior positions, drawing on our network of senior industry figures.

What Our Customers Say...

"One of Bechtel's competitive advantages is the use of EPCglobal's recruitment services. Access to EPCglobal's network of specialist engineering staff is an attractive proposition for anyone who, like me, has responsibilities for hiring professional and quality minded personnel for major projects, to deliver against tight deadlines. I always seek their involvement, especially for skilled and senior people."

Rob Van Duyl
Commercial Manager
Bechtel

"The reason I only work with EPCglobal is more than just access to the best opportunities, a flawless payroll and all the basics, it's about support from people I know and trust. The best thing about these guys is that they act in the interests of their people. They know their business benefits in the end by helping us make the right decisions."

Carl Swann
EPCglobal Contractor

EPCglobal Rail

Engineering Staffing Specialists

EPCglobal has been active in supplying staff and contractors for some of the UK's most important ongoing Rail Projects. We have supplied tactical and strategic staffing services to increase resource pools and help to guarantee project delivery.

The UK's first highspeed rail link, linking central London to Paris and beyond. EPCglobal supplied half of Rail Link Engineering's contract workers, 1000 people over 8 years, making a significant contribution to the projects ongoing success and upcoming delivery.

EPCglobal's consortium is the largest supplier of professional engineers to Tube Lines, the consortium managing the ongoing improvements to the Jubilee, Northern and Piccadilly lines. Their vital work continues to improve the service to 3m daily commuters.

EPCglobal are working with Network Rail to deliver staff and contractors to help maintain and improve Britain's rail network. Following important decisions to channel investment into in-house skills and redefine NWR as an engineering company.

Metronet continue to work toward improving the London Underground Network. As an approved supplier, EPCglobal are adding resourcing options and increasing the range and depth of professional engineers available to Metronet.

With 44,000 staff spread across 40 countries, Bechtel is the number one name in delivering major E&C projects. As Bechtel's global staffing partner, we are working with their thriving rail business to supplement their existing teams and add to their unrivalled reputation.
